1 Abstract

1.1 Project Profile

Table 1: Summary Sheet

Project Introduction			
Project Title	Rapeseed Oil		
Sector	Agricultural		
Sub Sector	Alterant Industries		
Location	Iran, North khorasan, Maneh & Samalghan		
The County	Maneh & Samalghan		
Products / Services	Crude colza oil, Colza cake		
Annual Nominal Capacity	700		
The Raw Material	Rapeseed		
Employment	23		Person
Land Area	3,360		m^2
Floor Area	1,999		m^2
Energy and Water Consumption	Water Consumption	5,000	m^3 in year
	Electricity Consumption	670	KW
	Gas Consumption	200,000	m^3 in year
Fixed Capital	112,830		Million Rial
Working Capital (The First Year)	27,830		Million Rial
Payback Period	2.93		Year
Net Present Value (NPV)	240,119		Million Rial
Internal Rate Of Return (IRR)	60		%
Modified Internal Rate of Return (MIRR)	29		%
Break Even Point	26		%
The Exchange Rate (Dolar)	240,000		Rial
Description	In this project, all the materials related to the study of the rapeseed oil market are examined.

Address	North Khorasan Province, Bojnurd, Chehelodometri Kamarbandi Blvd, North Khorasan Organization of Agriculture Jihad
Company's Legal Structure	Government <input checked="" type="checkbox"/>

2 Project Location

2.1 Province: North khorasan

2.2 The County: Maneh and Samalghan

Maneh and Samalqan County is a county in North Khorasan Province in Iran. The capital of the county is Ashkhaneh. The county has three districts: Central District, Maneh District, and Samalqan District. The county has four cities: Ashkhaneh, Pish Qaleh, Shahrabad-e Khavar and Qazi.

This project will be construct in part 076 with coordinates (489119, 4160378) in Maneh & Samalghan industrial park. Proposed location of project is shown in Figure 1.

Figure 1: Location of Proposed Land in Maneh and Samalghan Industrial Park

2.3 The Project: Rapeseed Oil

2.4 Access to the Infrastructures

Table 5: Access to Infrastructures

No.	Needed Infrastructures	Distance to the Project	The Supply Infrastructures
1	Water	0	not specified
2	Electricity	0	not specified
3	Gas	0	not specified
4	Telecommunications	0	not specified
5	High way	<1 km	is provided
6	Sub way	0	is provided
7	Airport	51	is provided
8	Amirabad Port (Behshahr)	384	is provided
9	Bandar Abbas Port	1,536	is provided
10	Rail way station of Joveyn	210	is provided
11	Rail way station of Jajarm	122	is provided

3 Technical Specifications of Plan

3.1 Product

Table 6: Project Specifications Based on ISIC Code

The Product	ISIC Code	Customs Tariff	Environmental Category
Crude colza oil	1514412306	15141100	4
Colza cake	1514512428	23064100	4

In this project, all the materials related to the study of the rapeseed oil market are examined. The purpose of the project is to strengthen the export sector, replace imports, etc. According to studies on the supply and demand of rapeseed oil, the production of this product from 2021 to 2025 will have an increasing trend that reassures new investors. Also, the import chart is declining and from 2021 to 2025 is predicted to be around zero, and its interpretation is self-sufficiency despite the domestic production capacity for this product. The export of the product has been zero since 2015, so there is a pristine ground for new factories to enter this wonderful market. Finally, domestic demand for rapeseed oil is increasing from 2021 to 2025. Also, between 2020 and 2023, there is a shortage of about 100,000 tons, which must be compensated by the construction of new factories. It should be noted that the factory under discussion of this project has an annual capacity of 700 tons, so it can be claimed that the investor of this project can act without concern. Undoubtedly, the most important reasons for justifying a project are based on its economic considerations. Gaining a suitable share of the domestic or foreign market, expanding the target market, and having appropriate financial and economic indicators (NPVR, IRR), and so on are among the most important goals of an economic enterprise to create or develop an industrial plan. In addition, the national and macroeconomic aspects of the project should be considered. Also, the study of the effect of project implementation on social and cultural indicators at the national and regional levels such as unemployment, labor migration, cultural effects, and finally the political considerations of the feasibility study, both nationally and internationally, can justify the necessity of implementing a project. Getting out of dependence on the outside, increasing domestic production, etc. can be studied and analyzed in this section.

3.2 Project's Requirements

Studies conducted by the Institute of Standards and Industrial Research of Iran indicate that the standard of the product of this project, due to the lack of active producers in the country, no standard has been set. But for similar products of this project, standards have been developed, and some of which are as follows:

No.	Description	Standard Number
1	Oilseed - The Size of the Impurity	3957
2	Oilseed-Laboratory Sample Conversion	3958
3	Oilseed-Measuring Acidity	8617

3.3 Space and Infrastructure Required

Table 7: Land Purchase Costs (Million Rial)

Specifications	Area (m^2)	Price per m^2	Cost		
			Paid Cost	Needed Fund	Total
A piece of land in Maneh & Samalghan	4,500	0.75	0	0	3,375

Table 8: Site Preparation and Development Costs (Million Rial)

Description	Working Capacity	Unit	Unit Price	Paid Cost	Needed Fund	Total
Excavation	1,800	m^3	0.3	0	0	540
Wall Construction & Door	540	m^2	9	0	0	4,860
Street Construction (5% of the amount of Land)	225	m^2	7	0	0	1,575
Green space & Lighting (1% of the amount of Land)	45	No	8	0	0	360
Total				0	0	7,335

Table 9: Civil Works, Structures and Buildings Costs (Million Rial)

Description	Area (m^2)	Unit Price	Paid Cost	Needed Fund	Total

3	Gas Consumption	m ³	200,000	1,200	240
4	Communications	-		120,000,000	120
Total					2,176

3.3.1 Equipment and Machinery

Table 11: Plant Machinery and Equipment Costs (Million Rial)

Description	Unit Cost	Costs Required				Total
		Local Costs	Costs of Currency		Cost to Complete	
			Rate	(M€)		
Silo	400	800	240,000	0.0032	0	800
Conveyor Belt	110	330		0.0013	0	330
Sieve Machine	160	160		0.0006	0	160
Silo	150	150		0.0006	0	150
Baking Tower	200	200		0.0008	0	200
Press	3,220	3220		0.0129	0	3,220
Reservoir	40	80		0.0003	0	80
Tanker	15	15		0.0001	0	15
Oil Pump	44.5	89		0.0004	0	89
Filter Press	130	130		0.0005	0	130

Description	Unit Cost	Costs Required				Total
		Local Costs	Costs of Currency		Cost to Complete	
			Rate	(M€)		
Reservoir	340	680		0.0027	0	680
Silo	150	150		0.0006	0	150
Pipes And Fittings	80	80		0.0003	0	80
Total Cost of Machinery		6,084	240,000	0.0243	0	6,084

- The exchange rate is: 1 € = 240,000 Rial

3.3.2 Raw Material and Intermediate Components

Table 12: Raw Material and Intermediate Components (Million Rial)

Description	Unit	Total Consumption of the Raw Material	Price per Unit of Raw Material	Annual Cost of Providing Material
Raw Material & Packaging	<i>Ton</i>	-	-	24943
Salary	<i>Rial</i>	-	-	2655
Energy Costs (Fuel, Electricity & Water)	<i>L/Kw/Cm</i>	-	-	2176.2
Repair & Maintenance	<i>Rial</i>	-	-	3393.56
Total				33,167.76

3.3.3 Management and Human Resources

Table 13: Salary of Administrative Staff (Million Rial)

No.	Position	Number of Shifts	Personnel per Shift (No.)	Total Staff (People)	Monthly Salary (per Person)	Annual Salary
1	Manpower (in Administrative Sector)	-	-	6	60	4,320
2	Manpower (in Production Sector)	-	-	17	56.9	11,610
Total				23		15,930

4 Market Study and Competition

4.1 Examining Supply and Demand Trends

The amount of rapeseed oil products supply based on production licenses (according to the information of the ministry of industry, mine and trade) inside the country from 2015 up to 2020 is shown in Table 14.

Table 14: The Amount of Rapeseed oil Domestic Supply

Year	Nominal Capacity (Ton)
2015	388,380
2016	533,931
2017	651,914
2018	949,852
2019	1,118,682
2020	1,552,801

The real production capacity of active units in 2015 up to 2019 is shown in Table 15.

Table 15: The Real Production Capacity of Active Units in 2015 up to 2019

Year	Nominal Capacity (Tons)
2015	94,393
2016	129,769
2017	158,444
2018	230,856
2019	271,889
2020	377,399

The following chart shows the prediction of production according to the Table 15 based on linear regression.

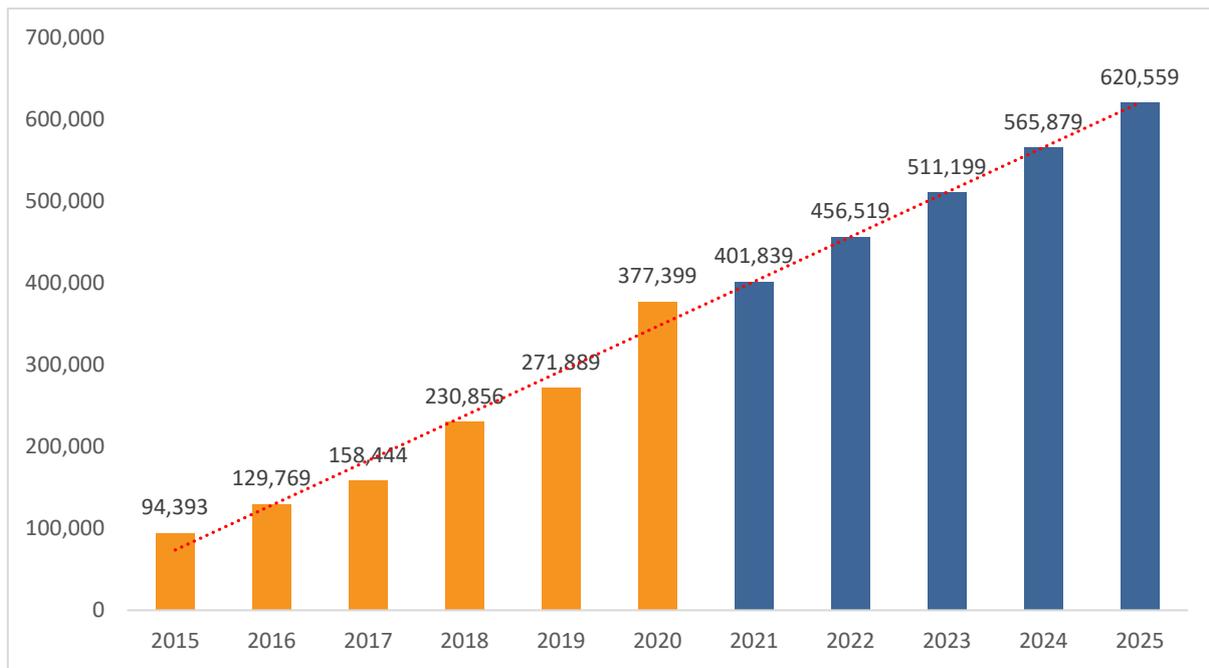

Figure 2: The Prediction of Production

As the **Error! Reference source not found.**Figure 2 shows, the amount of rapeseed oil production is increasing.

The amount of imports to the country is based on the information of the Tehran Chamber of Commerce, Industries, Mine and Agriculture at <http://tccim.ir> is presented in Table 16.

Table 16: The Amount of Imports

Year	Customs Tariff	Weight (Tons)	Major Countries
2015	15141100	0	-
2016	15141100	19,000	Swiss
2017	15141100	1,776	Spain
2018	15141100	437	Spain

The following chart shows the prediction of imports according to the Table 16 based on linear regression.

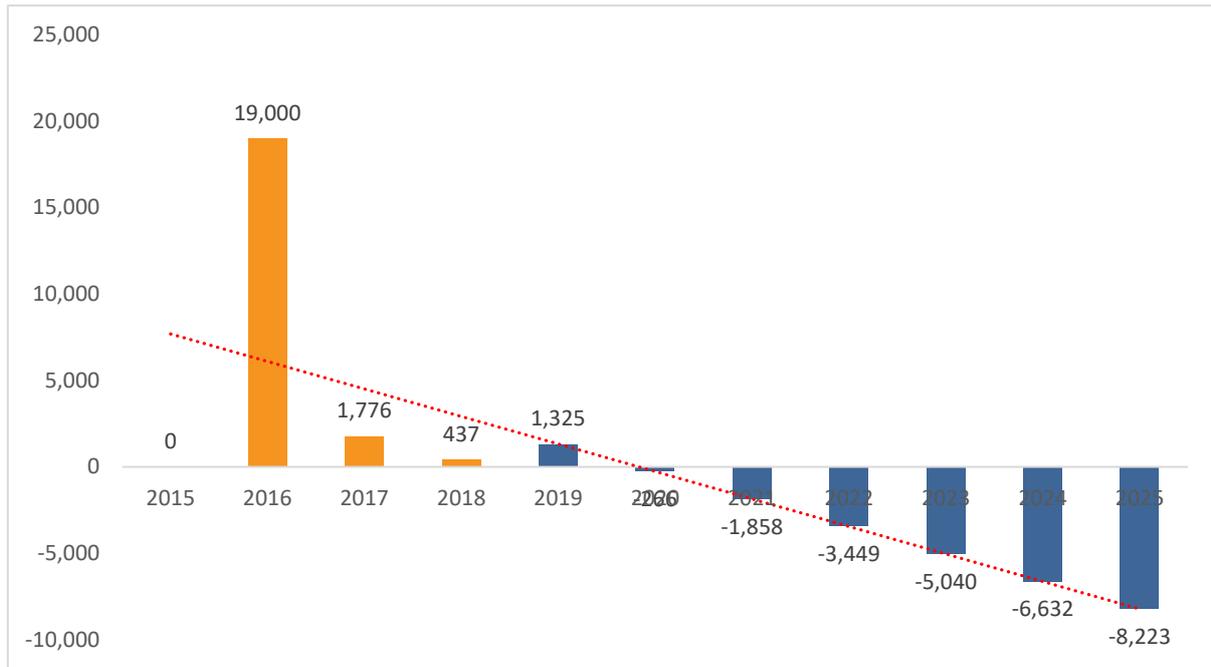

Figure 3: The Prediction of Imports

As the Figure 3Error! Reference source not found. shows, the amount of imports is decreasing.

The amount of exports from the country is based on the information of the Tehran Chamber of Commerce, Industries, Mine and Agriculture at <http://tccim.ir> is presented in Error! Reference source not found.Error! Reference source not found.Table 17.

Table 17: The Amount of Exports

Year	Customs Tariff	Weight (Tons)	Major Countries
2015	15141100	0	-
2016	15141100	0	-
2017	15141100	0	-
2018	15141100	0	-

The amount of domestic demand, which is equal to the amount of domestic production plus the amount of imports minus the amount of exports, for the three products is given in the Table 18.

Table 18: The Amount of Domestic Demand

Year	The Amount of Domestic Demand of rapeseed oil (Tons)
2015	94,393
2016	148,769
2017	160,220
2018	231,293

The following chart shows the prediction of domestic demand according to the Table 18 based on linear regression.

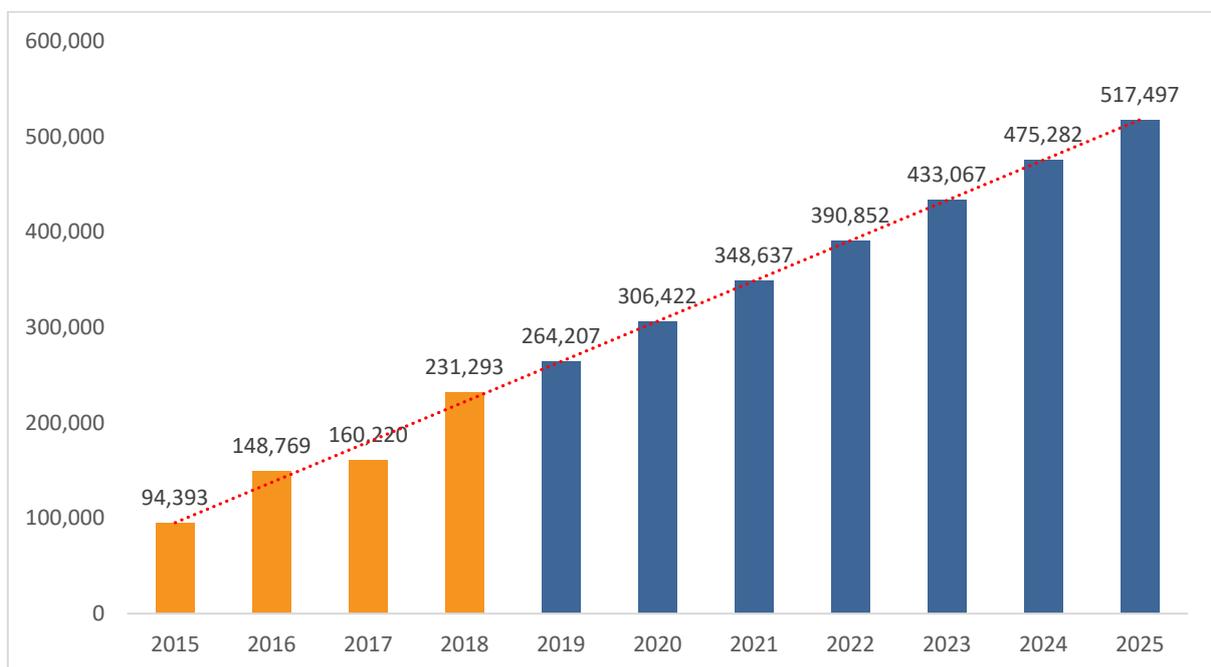

Figure 4: The Prediction of Domestic Demand

As the Figure 4 shows domestic demand of rapeseed oil is increasing. So it can be claimed that the factory can be established without the concern of selling the product.

In the Table 19, the information of the units that have obtained license is presented based on the amount of progress.

Table 19: The Information of The Units that have Obtained License

Progress Percent	Capacity (Tons)
0% - 25%	417,540
25% - 50%	3,000
50% - 75%	1,129,490
75% - 100%	10

7 Incentives, Features and Advantages of Project

North Khorasan Province is a province located in northeastern Iran. Bojnord is the capital of the province. This province contains many historical and natural attractions, such as mineral water springs, small lakes, recreational areas, caves and protected regions, and various hiking areas. Advantages of the agriculture of this province involves favorable and diverse climatic conditions and other parameters affecting growth.
